JANUARY 2024

MANIFEST YOUR LIFE WITH THIS MONTH'S NEW & FULL MOONS

You can tune into these Manifestation Mandalas, which are based on astrological elements, planets and zodiac signs, to magnetise specific energies or events into your life.

NEW MOON IN CAPRICORN

This New Moon is particularly effective for sowing the seeds of good resolutions and ambitious aspirations. Serious intent is required from you however, as poorly formed plans or half-hearted promises will not provide the correct level of commitment required to get your projects off the ground.

Taking a step-by-step approach can help you develop a strategy that should provide a realistic timeline in which to achieve your goals.

FULL MOON IN LEO

You have permission to pat yourself on the back for being so special – there is no-one else like you and there is nobody who can take your place. This is the perfect time to applaud everything you are and all that you can do.

Today's the day for those self-confirming affirmations which enhance your levels of confidence and pride. Visualise your name in lights, look in the mirror, and tell yourself how wonderful you truly are!

THIS MONTH'S MAJOR PLANETARY MOVEMENTS JANUARY 2024

<p>Tuesday 2 January</p> <p>PLANET MERCURY MOVES DIRECT IN SAGITTARIUS</p> <p><i>Sun Signs most affected: Gemini, Virgo, Sagittarius</i></p>	<p>You are becoming increasingly aware of how the nature of things can change, depending on where you are coming from and the circumstances that surround you. And you are starting to see that truth is relative. The only right answers are those based on 3D physical reality, like $2 + 2 = 4$. Everything else is a matter of opinion and subject to philosophical debate. So if someone tells you they know it all, you can assume they are suffering from a superiority complex. All they should be trying to do is offer you information which could lead you to come to your own conclusions.</p>
<p>Thursday 4 January</p> <p>PLANET MARS MOVES INTO CAPRICORN</p> <p><i>Sun Signs most affected: Aries, Capricorn</i></p>	<p>This could be seen as the most ambitious of planetary placements since it combines a willingness to win with the urge to achieve your ambitions. It helps you to define goals, particularly the type of aspirations that provide you with long term targets on which to focus your motivation and drive. The influence of Mars in Capricorn supports strategic planning to ensure the most effective use of energy and the optimisation of outcomes. Strict discipline is considered an asset, as is obedience to procedures and protocols which are guaranteed to get results. This is not the best time to improvise or to initiate unproven methods. Better stick to the tried and tested expertise that is readily available from existing instruction manuals and rule books. You could tap into the positive potential of this placement by using it to strengthen your resolve and reinforce your readiness to aim high. It may take longer and it could test your levels of patience and endurance to hold out for top-quality results but it will be worth it in the long run.</p>
<p>Thursday 11 January</p> <p>NEW MOON IN CAPRICORN</p> <p><i>Manifestation Mandala with Saturn & Capricorn</i></p>	<p>This is the optimum time to set intentions and sow seeds for new growth in your vocation, career or profession. You are at the initial stage of creating strategies which provide the structure and timelines to help build and sustain your progress. This phase could feel like selecting a recipe or template designed to generate new birth. But please be aware that the magic ingredient which guarantees successful outcomes for your plans is patience. Your ability to endure delays and disappointments is the key to gaining your goals.</p>
<p>Thursday 11 January</p> <p>DWARF PLANET ERIS MOVES DIRECT IN ARIES</p>	<p>Eris is blamed for being a negative influence but in reality, she is not the true source of conflict, rivalry and discord on Planet Earth. It is humans who misuse her power to promote and promulgate aggressive action in the world so as to satisfy their own selfish purposes. Feisty Eris would far rather see us behaving like the brave warriors and fearless heroines from ancient times who were ready to defend their tribes by waging war against the wild and dangerous forces of destruction which threatened their existence.</p>
<p>Sunday 14 January</p> <p>PLANET MERCURY MOVES INTO CAPRICORN</p> <p><i>Sun Signs most affected: Gemini, Virgo, Capricorn</i></p>	<p>Put your mind into planning mode. Use it to create strategies for long-term success. Draw on experience you have gained over time, and look to respected role models for their specialised guidance and instruction. This could be the optimal occasion to compile your CV. Make sure that everything you put into it is relevant and of interest to authority figures who might be interviewing you in future. It is important to stress the reasoning that guides your decisions, especially if they do not appear to follow conventional routes to achievement. This is a process which requires care and attention as it gives structure and form to your aims, ambitions and prospects.</p>
<p>Saturday 20 January</p> <p>THE SUN MOVES INTO AQUARIUS</p> <p><i>Sun Signs most affected: Leo, Aquarius</i></p>	<p>The Sun's force is now being filtered through the element of Air, which enhances your ability to think for yourself and to form your own opinions. Once you accept that your life is yours to control, direct and create you can get started on deciding what to do with it. Follow your own star, dare to be different, dazzle the world with your unique quality and style. You can determine your own destiny! The future is yours to fulfil. The properties of Sun Sign Aquarius work well in team settings, or in tribes of kindred spirits who hold similar ideas and ideals without being afraid to agree to disagree</p>

	<p>on specific aspects of a situation. This is a good time of year to join a group of like-minded souls who share your views on how to make the world a better place. Because Aquarius is associated with innovative technology, virtual meetings can be just as friendly as in-body experiences.</p>
<p>Sunday 21 January</p> <p>PLANET PLUTO MOVES INTO AQUARIUS</p> <p><i>Sun Signs most affected: Scorpio, Aquarius</i></p>	<p>Pluto is in the process of settling into Aquarius where it will reside for almost twenty years to come, although it will return to the last degree of Capricorn for a short stay (September-November 2024). The influence of this small but potent planet is intense, creating challenging circumstances which ultimately lead to transformation and rebirth. The transition time between breakdown and regeneration is tough, as is any experience whose purpose is to demolish and rebuild. The sign of Aquarius is all about social systems that honour Humanity as a whole rather than single individuals with specific qualities. Everyone, from humble to high, is an expression of an exclusive aspect of Cosmic Consciousness and should be respected for their unique contribution to society. If this fundamental principle of the Universal Order has been broken or ignored then Pluto will bring retribution to the lawbreakers. Their abuse of the powers granted to them will be revenged and the riches they accumulated will be removed and redistributed.</p>
<p>Tuesday 23 January</p> <p>PLANET VENUS MOVES INTO CAPRICORN</p> <p><i>Sun Signs most affected: Taurus, Libra, Capricorn</i></p>	<p>There is nothing starry eyed or easily deceived about Venus when she is in Capricorn. She is perfectly capable of falling in love, but only after she has considered the long term implications of sharing her life with someone. If you see yourself as rather too vulnerable when it comes to giving your heart away, you can invoke the expertise of Venus in Capricorn to help you hold back until you carry out a damage control inventory and put a definite plan in place. Insofar as natural gifts are concerned, Venus in Capricorn is very shrewd about assessing her own capabilities. She respects them but she does not overestimate their value. Her motto is practice makes perfect. She is prepared to put time and effort into achieving her ambition which is to make the most of her assets. Her reward is to be accepted as an expert in her field. You can tune into this aspirational aspect of Venus to help you realise how to turn your talents into tools for gaining professional recognition and success.</p>
<p>Thursday 25 January</p> <p>FULL MOON IN LEO</p> <p><i>Manifestation Mandala with The Sun & Leo</i></p>	<p>This is the right time to celebrate and be proud of who you are and what you have accomplished so far. You have proved your potential, you are aware of your ability and you are ready to take your well deserved place on the world stage. An authentic sense of inner self-respect will sustain you as you move into the next phase of your personal quest to express your true nature by honouring the promise you were born to fulfil. But a Leo Full Moon reminds us that, no matter how famous, influential and important a person perceives themselves to be they are not immune from the need to account for their behaviour while they are on planet Earth. Big-hearted loving kindness is the true gift of Leo, whereas pompous arrogance is the downfall of this sign.</p>
<p>Saturday 27 January</p> <p>PLANET URANUS MOVES DIRECT IN TAURUS</p> <p><i>Sun Signs most affected: Taurus, Aquarius</i></p>	<p>Moving through the stolid sign of Taurus, unpredictable Uranus is raring to revolutionise us in ways that we will not be able to ignore! His objective is to evolve us by waking us up and shaking us out of our comfort zones, even if the only way to do so is by making the ground move under our feet. We may quake in fear at the thought of such upheaval, but trapped inside most of us is an Inner Wild Child - a free spirit who is longing to break out of its box, however cosy the cage may be. Uranus aims to remind us that every single being who lives on Planet Earth has a unique value that cannot be replicated or substituted in any way.</p>
